

**A**re you sick of dragging your wheelie bin all the way to the garbage pick up point?.

Putting the bins out can be a real drag.

Lets face it sometimes the bins can be really heavy, and awkward, especially if it's up hill and the bins are full. Guess what! - Now theres an easier way,- you can tow it with your vehicle, ride on, tractor or whatever.

All you need is a WheelieTow!

“Whats a WheelieTow?”

WheelieTow is a simple device that just goes over your tow bar and connects to the wheelie bin.

And now there's Double WheelieTow, that allows you to take two bins at once.

It's easy - no sweat!

# WheelieTow™

Manufactured in Australia by

# WheelieTow™

*Wheelie bin companion*

***Don't drag  
your bin;  
-Tow it!***

# WheelieTow™ *Wheelie bin companion*

Manufactured in Australia by

The WheelieTow Bracket and Double WheelieTow Bracket are made from glass filled PA66 Nylon for extra strength. With securing caps made from TPE Polypropylene. Suitable for most types of road surfaces.

## Single WheelieTow Bracket

**1** Attach the Single WheelieTow to bin.

**2** Attach bin with WheelieTow over tow ball.

## Double WheelieTow Bracket

**1** Attach WheelieTow Double Bracket over Tow ball

**2** Attach bins with WheelieTows to Double Bracket. Attach securing caps on top for rough road usage.

Proceed slowly, at no more than 20 kph.  
Do not reverse with bins attached.
